

Paul Schubert is currently a Visiting Professor in the Science Department at Bard High School Early College in New York City. He has a strong interest in providing opportunities for students to experience project based design and engineering before they complete the college selection process. He has previously taught both high school and college chemistry at Bard. In an earlier time, he was on the Chemical Engineering faculty at Polytechnic Institute of New York where he taught Heat, Mass and Momentum Transfer, Process Control, and Biochemical Engineering.

He has over 25 years of industrial experience at Merck and Co. and the Pall Corporation. At Merck, he has had extensive experience in process development--scaling pharmaceutical processes from the bench scale, through piloting and then designing and commissioning manufacturing facilities. At Pall, he has also work in new product development and field troubleshooting. He retired from Merck as a Director of Chemical Engineering Research and Development.

He has a PhD in from Cornell University in Chemical Engineering and a BS from the University of Notre Dame in Chemistry.
